Report of the Superintendent

To the School Board of New Castle :

I herewith present to you my sixth report as superintendent of your schools.

The efficiency of a school is often judged, justly or unjustly, by the records made by its graduates while they are attending the next higher graded school. I believe, therefore, it will be of interest to the people of New Castle to know that their former pupils are doing uniformly satisfactory work in the schools which they now attend.

During the first two marking periods of the present year a total of 105 ranks was allotted to the seven pupils entering the seventh grade of the city schools. Among these 105 marks there appears not one failure. The same record holds true of the eighth grade which left the local schools one year ago. A perfect record of this sort is a definite proof of the efficiency of the New Castle schools.

The following figures taken from the statistics of the State Board of Education are given as of interest to all citizens of New Castle. During the last complete school year the median per pupil cost for elementary schools in the state of New Hampshire was \$76.93. The per pupil cost of the New Castle school was \$75.91, or \$1.02 below the state median. When we consider the cost of the school per \$1,000 valuation we find that New Castle is rather fortunate. Of the 238 towns in the state maintaining schools New Castle stands thirty-fifth from the lowest in its school costs.

New Castle is unique in the interest the parents show toward the progress of their children in school. The relationships between parents and teachers are relationships of co-operation and mutual sympathy and help. I believe this is one fundamental reason for the success of the New Castle schools.

One of the principles of modern teaching is the

placing before the pupils of positive rather than negative ideas. In other words, pupils should be presented with the idea of doing a task correctly rather than the idea of not doing it incorrectly. There is a vast difference. The former results in active participation in all things worth while and a positive character for good, while the latter often results in a negative reaction and perhaps a feeling of inferiority on the part of the pupil.

A visitor, entering the New Castle schools, cannot but be convinced that positive, rather than negative, teaching is the uniform procedure within these schools. This is proven by the sense of responsibility for the welfare of the school as a whole, which is shown by each pupil. The pupils consider that it is their school and not merely a school which they happen to attend. I believe this is efficient training for the future citizens of our town and nation.

The children of New Castle are naturally musical. The training they are receiving in this field is exceptional. Music is one of the most practical of subjects and will be a permanent force for good in our pupils' lives. Let us do all we can to aid in the work of this department.

Teachers, interested in each individual child, parents, sympathetic and co-operative, and a school board active in its duties for the welfare of the schools, guarantee to New Castle schools unquestioned success.

I believe our greatest advance during the past few years has been a noticeable improvement in the reading of our pupils. Reading is the basic subject. A good reader is a good student. To this may be traced the improved scholarship of our children.

Mrs. Dolbec has faithfully discharged the duties falling upon her. The results of her work cannot be measured in money costs. Her bi-weekly visits watching over the health of our children mean much to pupils and parents. In times of epidemic her advice is particularly valuable.

It is always a pleasure to visit New Castle and its schools. You as a school board have always been

kindly in your advice and helpful in your suggestions to me in my work for the children of New Castle. This I very much appreciate and herewith express my thanks.

Respectfully submitted,
ROY W. GILLMORE,
Superintendent of Schools.
